Brown Bridge Quiet Area Volunteer Planting Day!

Photo by Anderson
Aerial Photography

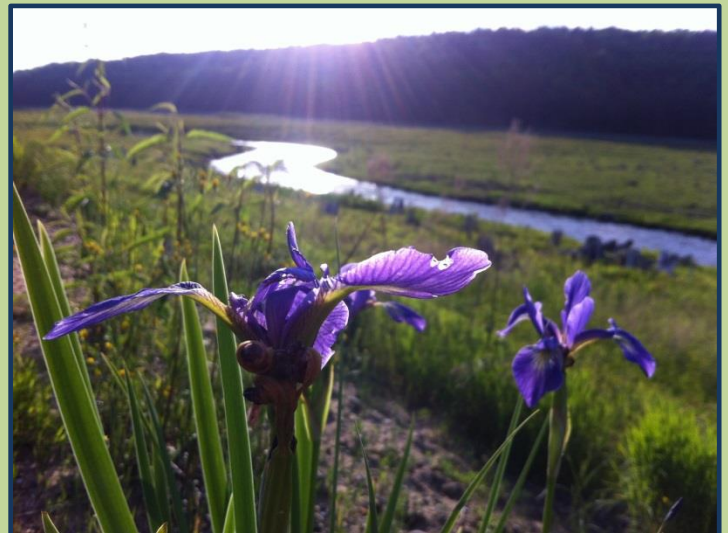

Date: Saturday, October 24th, 2015

Time: 9:00–3:30pm – (A light snack and water provided)

Location: Brown Bridge Quiet Area

Event Overview:

The upper stretches (circled above) of the “new” river at Brown Bridge need your help! This reach of river was dredged to re-locate the original channel lost under tons of sediment that accumulated over the 90 years Brown Bridge dam was in place. This sediment also covered the native seed bank far below. We are looking for volunteers to assist with planting native tree and shrub seedlings, as well as herbaceous grasses and wildflowers to help reestablish a healthy riparian corridor. This opportunity is open to anyone capable of working by foot on soft and uneven terrain.

RSVP Requested: Please email Steve Largent at slargent@gtcd.org or Reb Ratliff at rratliff@gtcd.org, or call 231.941.0960.
